01 / COMPANY OVERVIEW

Manufacturing at a glance

Bowen develops, manufactures and supplies automotive components, combining product research with in-house production and technical service.

Factory buildings at the Bowen manufacturing site

10,000+ m²
Total company site area

3,500 m²
Production workshop area

100+
Pieces of production equipment

A foundation built over time

Established in 2009, Qufu Bowen Auto Parts Manufacturing Co., Ltd. expanded its operations with the construction of a factory in 2014. The site includes more than 2,000 m² of temperature-controlled workshop space.

From development to manufacture

Our technology center and dedicated R&D team support a product range serving a wide variety of vehicle models. Production equipment includes automated assembly systems designed and developed in-house.

We work with manufacturers and distributors, supported by professional sales and technical service teams.

02 / PRODUCT PORTFOLIO

Automotive product range

Our portfolio covers thermostats, temperature sensors and vehicle switches for a wide range of vehicle models.

Thermostat

Thermostat assembly

Thermostat assembly

Temperature sensor

Oil pressure warning switch

Brake light switch

Thermostats

Components for engine coolant temperature regulation.

Temperature sensors

Components for detecting temperature in vehicle systems.

Thermal switches

Switching components that respond to temperature.

Oil pressure warning switches

Components for oil pressure warning circuits.

Reversing light switches

Switching components for reversing light operation.

Brake light switches

Switching components for brake light operation.

Product selection is application-specific. Discuss the vehicle model, part reference and technical requirements with our team.

03 / FACTORY ENVIRONMENT

Inside the factory

Our facilities bring together machining, component assembly and dedicated work areas for automotive parts production.

Production workshop with defined aisles and workstations

Machining workshop

Component assembly workshop

The production site combines workshop space with supporting storage areas. More than 2,000 m² of temperature-controlled workshop space forms part of the company's facilities.

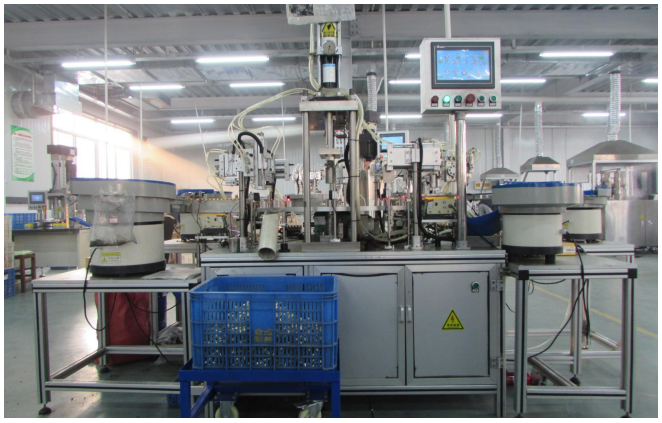

04 / AUTOMATED PRODUCTION

Automation on the shop floor

Automated assembly is an important part of our manufacturing capability. Our equipment includes assembly systems developed in-house.

Automatic assembly area

20 series automatic assembly machine

211 series automatic assembly machine

Dedicated equipment supports assembly operations for different component series. The factory also uses automatic riveting and rubber plug assembly equipment.

05 / PRODUCTION EQUIPMENT

Equipment for key operations

Our equipment base supports both machining and assembly, with dedicated machines for specific production operations.

CNC machining equipment

24 series automatic assembly machine

Rubber plug automatic assembly machine

Automatic riveting machine

Manufacturing experience backed by equipment

More than 100 pieces of production equipment support our operations. In-house equipment development complements the team’s manufacturing experience and product knowledge.

06 / INSPECTION AND TESTING

Adjustment and testing

Our factory equipment includes integrated adjustment and testing machines, together with a dedicated thermostat life test bench.

211 series sensing element adjustment and testing machine

20 and 24 series sensing element adjustment and testing machine

Thermostat life test bench

Dedicated stations bring adjustment and testing into the production environment. We combine this equipment with ongoing improvements to our quality management practices.

07 / RESEARCH AND DEVELOPMENT

Development within Bowen

A dedicated R&D team and technology center support independent product development and the application of new manufacturing solutions.

Equipment within the manufacturing workshop

Turning development into practical application

Bowen has brought 29 scientific and technological achievements into practical application. Our development work covers automotive components as well as automated production equipment.

Building on product and process knowledge

We develop our product ranges independently and draw on our manufacturing experience to refine production processes. Continuous improvement remains part of how we develop the business.

08 / WAREHOUSING AND PACKAGING

Storage through to packaging

The factory includes warehouse space for components and finished goods, alongside product packaging and packed-carton storage.

Warehouse with racking and designated storage locations

Finished goods warehouse

Warehouse storage area

Supporting the supply process

Racked storage, reusable containers and product cartons form part of the factory's handling and packaging arrangements, linking production with preparation for supply.

09 / CUSTOMER COOPERATION

Working with Bowen

We serve manufacturers and distributors with automotive components and supporting technical services, with a focus on long-term business relationships.

Assembly workshop at the Bowen factory

Product development

A dedicated R&D team and independently developed product ranges support discussions about application needs.

Technical communication

Professional sales and technical service teams provide a point of contact for product and application discussions.

Manufacturing capability

Machining, assembly, adjustment and testing equipment support automotive component production.

Continuous improvement

We refine our production, quality, business and service management practices as requirements evolve.

To begin a product discussion, prepare the part reference or drawing, intended application, technical requirements and expected quantities.

10 / MANAGEMENT SYSTEMS

Certification and scope

Our management system certifications cover thermostat manufacturing and the related environmental and occupational health and safety activities.

Certificate of Registration

nqa

This is to certify that the Quality Management System of:

Qufu Bowen Auto Parts Manufacturing Co., Ltd.
No. 3, Duzhi Road, Qufu Electronic Information Industrial Park, Jining City, Shandong Province, 273100, China
(IATF USI: CCHE25)

applicable to:
The manufacture of thermostats

has been assessed and registered by NQA, Warwick House, Houghton Hall Park, Houghton Regis, Dunstable, LU5 5ZX, UK

against the provisions of:

IATF 16949:2016
(Clause 8.3 product design of IATF 16949:2016 is justifiably excluded)

This registration is subject to the company maintaining a quality management system to the above standard, which will be monitored by NQA.

Managing Director

NQA Certificate No:	T184734
IATF Certificate No:	0513244
First Issue Date:	25 April 2024
Valid Until:	24 April 2027
Version:	1

Reproduction of the IATF 'globe' logo in any form is strictly prohibited by copyright

NQA is a trading name of NQA Certification Limited. Registration No. 09351758. Registered Office: Warwick House, Houghton Hall Park, Houghton Regis, Dunstable Bedfordshire LU5 5ZX, United Kingdom. This certificate is the property of NQA and must be returned on request.

Revision Date: Feb 2017 Page 1 of 1 Issue 5

IATF 16949:2016

Automotive quality management system

Scope: manufacture of thermostats.
Clause 8.3 product design is excluded from the certification scope.

Certification body: NQA
IATF certificate: 0513244
NQA certificate: T184734
Issue date: 25 April 2024
Expiry date: 24 April 2027

ISO 14001:2015

Environmental management system

Scope: environmental management activities related to thermostat processing.
Certificate: 05325E31120R0S

ISO 45001:2018

Occupational health and safety management system

Scope: occupational health and safety management activities related to thermostat processing.
Certificate: 05325S31042R0S

ISO 14001 and ISO 45001 certificate period: 10 July 2025 to 9 July 2028. Certification is subject to ongoing surveillance.

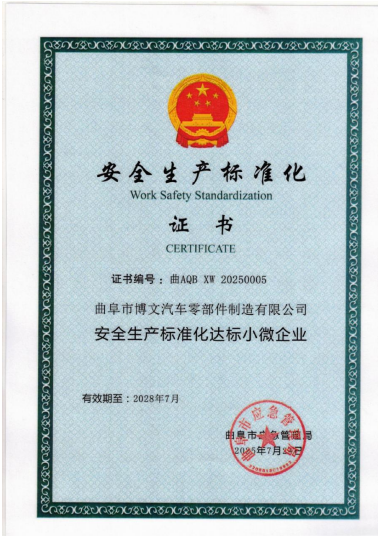

11 / QUALIFICATIONS AND HONORS

Qualifications and recognition

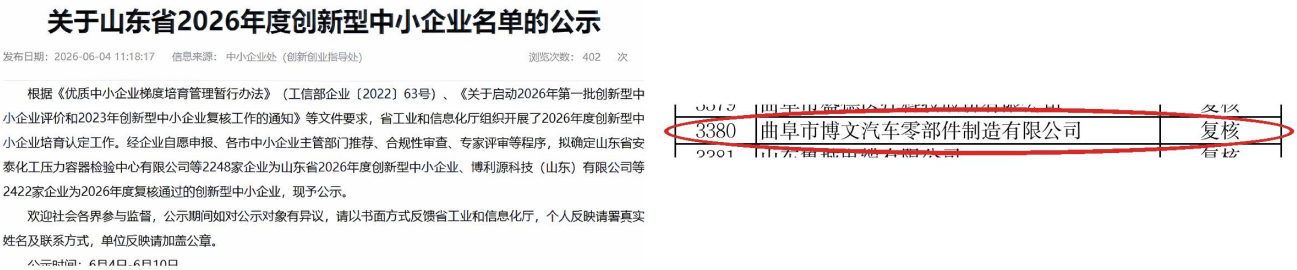

Bowen continues to strengthen its management systems and innovation capabilities. The qualifications and public recognition below reflect this work.

High-tech Enterprise Certificate

Work Safety Standardization Certificate

Shandong Province 2026 Innovative SME Public List - Entry No. 3380

BOWEN
